GHS Labeling Software

Reliance
Label Solutions

GHS Chemical Compliance labeling made easy

The Globally Harmonized System (GHS) requires labels and documentation to clearly and consistently communicate important information about the hazardous goods being handled. Vision[®] GHS Labeling Software enables users to organize and select the vital information required for these labels, creating a safer workplace.

Vision GHS Labeling Software from Reliance Label Solutions is a secure, cloud-based label printing software solution. Utilizing on-demand distributed label printing functionality, centralized content and user controls enables production of high-quality GHS labels across a network of printers.

Vision[®] GHS labeling software is used every day by petroleum marketers, chemical manufacturers, chemical distributors and Fortune 100 petroleum refiners in more than 30 countries.

Vision 4: The hub of your GHS solution

Optimized for small businesses and large corporations alike, Vision offers a seamless solution to increase label quality control while decreasing label design maintenance. To satisfy the unique needs of each company, we offer three editions of Vision[®] software: Vision Express[®], Vision Pro[®] and Vision Enterprise[®].

Vision & GHS Compliant Labels

We know the importance of maintaining regulatory compliance. Updates are made to label designs, business rules, and pictograms as regulating entities enforce new rules for the industry. Using Vision, you can easily print GHS compliant labels in multiple sizes, formats and languages.

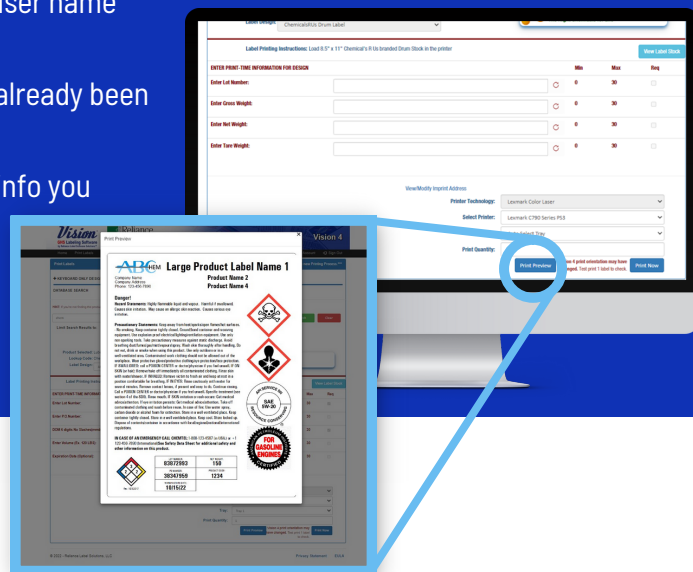

Reliance: The Label Experts

Reliance Label Solutions is a leading provider of GHS labeling solutions since 2003. With decades of experience serving the petroleum and chemical industries, Reliance offers a complete GHS labeling solution for our customers, stock or custom labels, printing systems and our Vision GHS Labeling Software.

Beyond Vision, Reliance can assist with all your printing solutions and connect everything to help you meet your GHS labeling requirements.

Printing GHS Labels

- Login to Vision using Chrome, Edge or Firefox, using your secure user name and password.
- Select any custom label design in your library. (The label data has already been mapped to the Vision database by our programmers).
- Enter the batch or lot number, date, address or any other custom info you require.
- Select the printer and make sure the correct label stock is loaded.
- Print Preview the label, if you wish, then select a Print Quantity and click Print Now. That's all!

Vision provides chemical manufacturers, chemical distributors, lubricant refiners and petro marketers with a powerful and user-friendly label solution that enables on-demand label printing on a global 24/7 basis.

With Vision® GHS labeling software, you don't have to be a label design expert. We will build all of your label templates for you, following your guidelines. Our experience working with hundreds of clients has given us broad industry experience to help provide you with GHS label templates that are fully compliant with GHS, DOT and other standards.

Scalability with SaaS Vision is available in three editions varying in capabilities and costs. Each package determines the extent to which the solution can be tailored to your specific needs. When enterprise level data is required on your labels, Vision can be automated to connect with your ERP, SDS, TDS and other business system databases that support integration solutions.

Cloud-based Vision's cloud-based architecture allows for centralized control of the label content database while providing 24/7 secure, real-time delivery of that label content in a distributed label printing environment. With Vision, there is no IT infrastructure to purchase or maintain.

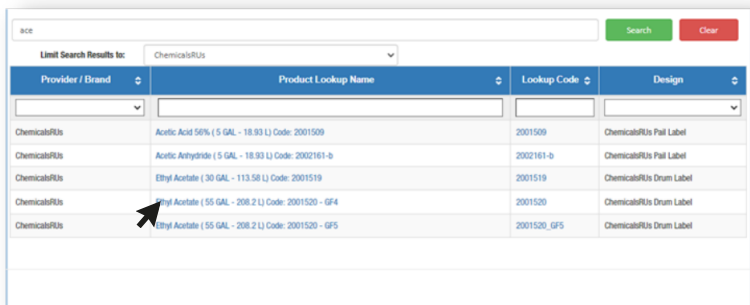

Easy to Use Management of the label content database is as simple as copy and paste. With SDS and ERP integrated solutions, simply select a document version from a list box and all related ERP and SDS data is mapped to your label design in the background.

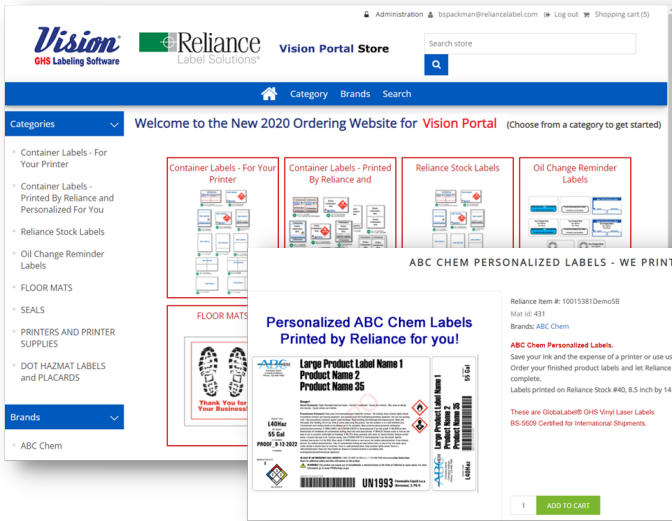

Simple Printing With dropdown menu label selection and label in-page previewing for user confirmation.

Security Vision provides secure password protected online ordering of all labeling supplies from your custom catalog with the click of a mouse. Levels of data access can be created based on the user's login.

Access Label Database Using Dynamic Search

Using Vision's dynamic Search, filter through hundreds of labels with ease. Find the right product label and create a beautiful custom label in seconds.

Ordering Label Stock and Supplies

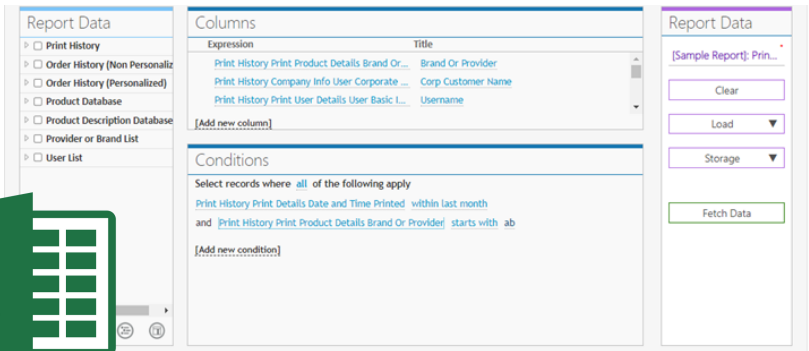

After you've finished your GHS label printing for the day, tab over to the Portal Store and order blank GHS label stock, printer consumables and supplies, plus DOT labels and placards and many other products you use in your business.

Depending on your Vision package, a custom store within Vision can be created with items specific to your company. You can order custom label stock, preprinted labels and more all from one place. Business rules determine the products and order content that users can access.

Reporting

Vision GHS Labeling Software lets you use Reports to confirm what is actually printed. Our easy-to-use Report Feature allows you to see what is stored in our Vision databases.

Analyzing print trends has never been easier with our wide range of pre-programmed reports and custom filter options.

Provided Reports Depending on the solution you purchase (Pro or Enterprise) we have pre-loaded some common reports. Simply load them, add any relevant parameters (dates, etc.) and preview

Custom Reports Select custom fields, create new filters and sorting to see exactly the historical data you want. Save these custom reports to use again.

Re-Print Since you can save your custom reports, the next time you need a report you can simply pull up your saved report and print it.

Report Assistance Since the report feature has several options, you can call us for help if you need guidance with this feature.

Export At a click of a button each report prints to the screen but can also be easily exported to a file (Excel or CSV).

Label Administration Assistance

Reliance provides online and phone support for our Vision software. If you should have any questions, Reliance Technical support will assist you. Click "Help" at the top of the site to see our customer service and technical support contact information. Email techsupport@reliance-label.com or orders@reliance-label.com to notify our Technical support and Customer Service teams, or call 800-656-9476 for immediate assistance.
